

Research and innovation

The partnership

The UPPA makes its pool of **skills and expertise** available to companies and local authorities, as well as its **high-performance instruments** | 📄 through several types of **partnership**: research collaboration, CIFRE collaboration, access to specific equipment, service provision or even a doctoral student's expertise assignment. A partnership tailored to the company's innovation project. More than a hundred contracts are signed each year for an average turnover of €3.5 million.

Technology transfer and company creation

The UPPA has entrusted the management of the research and technology transfer activities of its laboratories to the **SATT d'Aquitaine** and relies on the Chrysa-Link incubator to promote its results in the creation of companies.

- 38 patent families
- 6 active licences
- 15 Framework agreements with companies
- 25 business creations supported by UPPA in 10 years
