

Research Chairs

34 High-Level Expertise Chairs

In 2021, the University of Pau and the Pays de l'Adour has 34 high-level expertise chairs to meet the major challenges of the energy and environmental transition.

Over an average period of five years, each chair combines **research activities** and **training of excellence** thanks to a small research team led by a well-known scientist. These chairs also allow for increased partnership and international collaboration.
