

Partners

The EDENE program aims to train future researchers while developing their capacity for innovation, through collaborations between research centers of excellence and public / private partnerships. But it also aims to strengthen collaborations with socio-economic players in the area and cross-border university players. For this, 7 partners are collaborating with the UPPA:

- the University of Zaragoza,
- international companies (TotalEnergies, Enedis, NALDEO, Teréga),
- a competitiveness cluster (POLE AVENIA) and
- a technology transfer office (Aquitaine Science Transfert - SATT)

By relying on its strengths in terms of location (the Pyrenean region of France, neighboring Spain), the UPPA has developed cross-border collaborations and solid partnerships with international companies established in the southwestern region of France.

Région Nouvelle-Aquitaine and Communauté d'Agglomération Pau Béarn Pyrénées are cofunding Cohort#1.

This project has received funding from the European Union's Horizon 2020 research and innovation program under the Marie Skłodowska Curie actions, Grant Agreement No. 945416.
