

Technology Transfer

UPPA has entrusted its research validation and technology transfer activities to the Aquitaine technology transfer acceleration company [Aquitaine Science Transfert](#). It has also set up research validation structures in specific sectors.

Tree application units

- * **CHLOE**: application unit in the field of modelling subsurface production mechanisms in partnership with TOTAL – Backed by the IPRA federation.
- * **OPERA**: application unit in the field of petroleum geophysics in partnership with TOTAL – Backed by the IPRA federation.
- * **SET Transfert**: application unit in the field of the human and social sciences proposing an expertise around the town and country planning and around the sustainable development - Backed by PASSAGES laboratory

Two technology centres

- * **UT2A** (Ultra-Trace Analyses Aquitaine) is an interface structure providing companies with high technology in the field of analysis.
- * **CANOE** is a centre of technological innovation in the field of composites and advanced materials (nanostructured, bio-sourced, etc.)

Technology platform

- * Aquitaine Bois is a technology platform associated with the wood materials engineering department.
